

Appendix B: Checking prompts against a “control” report that explicitly employed a GBA+ Framework

To double check the prompts we developed were being understood correctly, we found a public report which explicitly employed a GBA+ Framework titled [Gender-Based Analysis Plus Exploratory Evaluation Study on Selected Labour Market Programs](#). We ran the standardized prompts against this and achieved this summary, which reassured us that the prompts were being understood.

Evaluation Summary by Topic

Framework Topic	Status	Notes
1. Gender	✅ Clearly addressed	Gender-based analysis is central to the report. Differentiated outcomes for men and women are explicitly discussed.
2. Diversity & Identity Factors	✅ Clearly addressed	Strong intersectional analysis across gender, age, disability, and immigration status.
3. Data Disaggregation	✅ Clearly addressed	Uses machine learning to analyze disaggregated data across identity groups.
4. Inclusive Policy Design	⚠️ Partially addressed	Offers insights for inclusive design, but inclusivity was not part of original program development.
5. Impact Analysis	✅ Clearly addressed	Assesses how different groups experience outcomes differently.
6. Engagement & Consultation	⚠️ Partially addressed	No mention of direct consultation with diverse participants during evaluation.
7. Mitigation of Inequities	✅ Clearly addressed	Clearly identifies and recommends ways to reduce systemic barriers for marginalized groups.
